AUTUMNWOOD

COLLECTION

SUPER POLYMER SIDING

Engineered for **Lasting**
Curb Appeal

There's only one thing you'll love more than the beauty of Autumnwood Collection Super Polymer Siding – and that's the easy maintenance. You can hang up your brushes and say goodbye to scraping and painting because Autumnwood is virtually maintenance free.

The woodbark texture gives you an authentic wood surface impression. It looks like real wood... but doesn't split, rot, flake or peel. So instead of spending your time painting, you can spend your time admiring your home.

Double 5" Dutchlap - Sage

An Outstanding Choice for Siding

Autumnwood Collection is one of Heartland's finest Super Polymer Sidings. Homeowners appreciate the latex soft, wood grain finish. Eliminating unsightly glaring helps Autumnwood finished homes achieve a look of subtle sophistication. Builders and renovators like the post-formed lock that is engineered to provide a positive locking system to keep the siding firmly in place on the wall.

For excellent features and practical value to match, Autumnwood Collection is the choice for you.

Double 4.5" - Sandalwood

Color is a very important aspect of personalizing your home.

However, that color has to last and that's where Heartland Siding shines. We've specially developed anti-weathering materials, including **SPX-2000 UV Blocker**, that are melded into the siding surface to fight exposure to the elements and the destructive effects of the sun's UV rays. Heartland Siding backs up that claim by offering our **Color-Keeper™ Anti-Fade Protection Guarantee**. Every color formula is meticulously engineered with the finest mix of ingredients that build a stronger molecular chain for superior color retention.

The color you pick isn't the only thing that has to last. In any household, scratches and abrasions can happen. That's why Heartland Siding is formulated with **Tri-Pigment Reflective Technology**. This unique combination of inorganic pigments, additives, impact modifiers, and PVC resins ensure color saturation and allow scratches to virtually disappear. Plus, it reflects heat away from exterior walls and deflects damaging infrared solar rays.

Bringing imagination to life.

That's the role of great design. Today, designers across the country are imagining neighborhoods filled with homes of unique character and curb appeal in a variety of price ranges. It's a vision that asks a lot of exterior cladding. It must be attractive yet versatile, able to provide both great looks and great value. No wonder today's vinyl siding is chosen most often to bring great design to life.

Get inspired. Be creative. Have fun!

Siding, along with an extensive
portfolio of ProVia products, can
completely transform your home.

Perhaps the real beauty of designing with vinyl siding is how well it suits homes in any price range, whether new construction or renovation. The average installed cost is lower than any other cladding partly because vinyl siding goes up faster and doesn't need painting - at installation, or ever. That initial value is enhanced, thanks to vinyl siding's long-term durability and technological advancements.

Today's vinyl siding offers all the character and charm of wood siding without maintenance worries, rotting, splitting or insect damage. And vinyl siding never needs paint.

Unlike other exterior cladding, vinyl siding only requires periodic cleaning with a garden hose and everyday household cleaners. A list is available in the About Vinyl Siding section of **www.vinylsiding.org**.

How does **Autumnwood** compare to the competition?

	Autumnwood Vinyl Siding	Fiber Cement Board
Durability	Engineered to provide optimum stiffness and reliable stability, while remaining lightweight	Susceptible to freeze/thaw complications As an absorptive cladding, fiber cement can hold moisture, creating the potential for penetration leading to rot, mold and/or poor indoor air quality
Beauty	An ever-increasing spectrum of colors, including darker options and period colors for historic restoration	Prefinished options are available at a higher cost and in a limited range of colors Must be painted and repainted at regular intervals
Maintenance	Only requires simple periodic cleaning with mild soap and a garden hose Does not require caulking	Must be repainted to maintain appearance and moisture resistance Caulking, especially where panel meets trim, must be maintained to help prevent damage due to moisture
Installation	Starts performing from the moment it's installed without labor-intensive priming, caulking or painting	If not prefinished (at added cost), fiber cement must be primed, painted and in some areas, caulked
Environmental Impact	Can earn points in leading green building programs because it requires no additional finish resources, is a durable product with rainscreening characteristics and may contain recycled content	Contributes to earning relatively few points in the ICC 700 National Green Building Standard™
Value	Lower total installed cost (includes material and labor) and more efficient at the jobsite Never requires painting No long-term maintenance costs	The initial purchase price (including labor and finish costs) is more than 51% higher than vinyl siding Requires priming and one or two coats of paint; preprimed and prefinished boards can carry an upcharge of up to 15% Requires repainting to maintain appearance

For more information about vinyl siding vs. fiber cement, visit www.vinylsiding.org.

"To serve, by caring for details in ways other's won't." It's not just our mission, but a way of letting our light shine every day at ProVia. We continually strive to put these words into action by providing unmatched quality and service. The heart-shaped weep hole symbolizes each employee's commitment to devoting the utmost care, pride and quality into each building product we manufacture...it's The Professional Way.
