What the Best Homes are Wearing®

ENVISION

# LET GO

**A M E R I C A N**  
**Splendor**  **:Stately Grace.**

You lovingly invest years of your time enjoying, refining and caring for your most treasured possession: your home. Finally, there is a way to surround that invaluable investment in exceptional protection and unsurpassed splendor: American Splendor® vinyl siding by NAPCO®, rated highly by a leading consumer magazine\*.

# BELIEVE

**Painting, who needs it? (Not you.)**

Wood siding has an arguably attractive finish, but it loses its allure the moment you realize it's peeling, chipping, cracking, flaking... you get the picture. Once American Splendor® vinyl siding is on your home, it's a picture you'll soon forget. American Splendor® gives you the look you love, minus the associated maintenance. And it will last and last, in the face of all sorts of weather and perhaps even a wayward curve ball or two. Season after season, American Splendor® vinyl siding will help protect your home, beautifully.

**Quality, like success, can be beautiful.**

For over 45 years, NAPCO® has manufactured high quality vinyl siding and exterior design products. All are subject to the toughest scrutiny: our own. We test the quality and performance of every product to assure that it will look great on and protect your home. Then, we back it with our Limited Lifetime Transferable Warranty.

\* American Splendor vinyl siding was rated highly by a U.S. consumer magazine in August 2003

# ENLIVEN

## WHY

- Available in Double 4" and Double 5" Traditional Lap or Double 4.5" Dutch Lap
- Uniform color from panel to panel
- Lasting color withstands the elements
- .046" panel thickness – durable, sturdy, impact resistant
- Limited Lifetime Transferable Warranty

### Create a beautiful look that's all your own.

American Splendor® vinyl siding by NAPCO® offers a wide array of traditional colors and profiles certain to please your creative fancy. Every color features our ultra low gloss finish for a beautiful just-painted look that lasts. Better yet, American Splendor® vinyl siding traditional panels have a consistent color and finish, designed to remain beautiful for years. We quality check to make sure, conducting lab tests and exposing panel samples to years of natural sunlight and hot weather.

As for the panels themselves, you'll find a variety of profiles to choose from. And, at .046" thick (the thickest panel NAPCO® makes), American Splendor® vinyl siding panels are as tough as they are beautiful. Each features a natural cedar emboss for an authentic wood appearance.

### Nothing transforms a home's appearance more dramatically than color.

What the Best Homes are Wearing®

## Premium Signature Series colors with extra UV and sun protection for a fade resistant finish

*Signature*  
S E R I E S

rich. dark.  
COLORS.

Nine dramatic, dark hues that remain beautiful season after season—that's the essence of NAPCO® Signature Series colors. Each panel is infused during manufacturing with **Luran® S ASA resin from BASF** to increase color retention and consistency, insuring a rich, beautiful finish that's equally fade-and weather-resistant.\* All wrapped up in one strong yet striking package.

Signature Series color retention over time

**RIGITUCK**

Exclusive RigiTuck® rolled-over nail hem gives panels a tight grip to your home for an extra measure of rigidity and a tighter seal, helping to keep rain, wind and assorted creatures outside... where they belong.

**XACT  
FIT**

Our patented, oversized lock and curl design delivers a 6-layer attachment point per panel, providing incredible rigidity. The result? More protection, better resistance to blow-offs and a smoother, straighter appearance.

### **Stay inside, scoff at the elements.**

No one can predict the weather. But you can predict the performance of American Splendor® vinyl siding by NAPCO®, thanks to what's inside. NAPCO®—developed technologies help defy the elements by locking and sealing your siding tight to your home, providing a nearly wind-impervious lock. At last, you can weather whatever comes your way with confidence, knowing your home is well protected.

### **Wind resistant up to 210 mph\*!**

Patented Xact-Fit® and revolutionary RigiTuck® components work together to increase strength and rigidity, helping the panels stay locked and mounted even in high-velocity winds.

### **Heat & cold resistant.**

American Splendor® vinyl siding resists impacts, even in cold weather. In hot weather conditions (and our own heat distortion tests), the panels maintained their shape without warping or sagging.

## NAPCO® Products are Earth friendly

NAPCO® vinyl and metal exterior products can help you meet your sustainable building goals and earn points in leading green building certification programs. NAPCO® strives to contribute to sustainable building practices, improved energy efficiency, or lifecycle benefits of homes as our contribution to the Ply Gem Enviro initiative.

### SUSTAINABLE RESOURCES:

- NAPCO® vinyl siding is manufactured from abundant natural resources
- Vinyl siding generates less construction site waste than cardboard packaging, brick, or lumber.
- Ply Gem facilities reuse and recycle production scraps, pallets, and packaging material, reducing raw material needs and landfill use.

### ENERGY EFFICIENCY:

- Vinyl siding requires less energy to manufacture per square foot than brick and mortar.<sup>1</sup>
- Due to lighter weight, vinyl siding requires less fuel to transport than other cladding options.
- NAPCO® American Essence™ Premium Insulated Vinyl Siding adds an extra layer of continuous insulation to the exterior wall, increasing the efficiency of the wall system.

### LIFECYCLE BENEFITS OF HOMES:

- NAPCO® vinyl siding is durable and requires no site finish.
- When installed properly and under normal use, our products should never require painting or staining. They won't crack, peel, blister, or rot.

**American Splendor® by NAPCO® has been Green Approved by the NAHB Research Center.** This means you can be assured that this product complies with specific green practice criteria in the National Green Building Standard. Visit [www.GreenApprovedProducts.com](http://www.GreenApprovedProducts.com) for more details.

## enviro snap SHOT

LEED FOR HOMES – POSSIBLE POINTS

LEED NEW CONSTRUCTION – POSSIBLE POINTS

NAHB STANDARDS – POSSIBLE POINTS

- **Never needs painting, won't blister, flake or peel\*\***
- **Scratch-resistant color-through technology**
- **3/4" panel projection for maximum rigidity and straighter application**
- **Beautiful cedar finish**

## Hale, hearty and high-tech.

Boasting an amazing panel thickness of .046", American Splendor® vinyl siding is built to withstand all sorts of dents without flinching. Adding to that toughness is a unique color-through technology, which minimizes the appearance of scratches. Together, these features can help shield against weather and more.

American Splendor® vinyl siding features a 3/4" panel projection, which creates an attractive deep shadow line on the panel below, enhancing the real-wood appearance. It also helps make the panels very rigid, so you'll get a beautiful, straight line... even if your walls aren't entirely straight.

\* Tested in accordance with ASTM D5206. Wind speed rating will vary depending on specific code region and construction method. Refer to local building codes for detailed requirements concerning allowable wind loads and specific conversion tables for actual wind speed. \*\*see warranty for details † when properly installed

**Last look: It's all in the details.**
