# Easton Double Hung

## Features & Benefits

- *Solid color-through virgin vinyl maintains a natural appearance and will not chip, peel, corrode, rot or requires painting or scraping.*
- *Multi-Chambered I-Beam structural mainframe provides superior strength and rigidity while offering the most adaptability for all installation methods.*
- *Modern fusion-welded beveled frame combines excellent energy efficiency and beautiful aesthetic appeal.*

- *5 degree sloped sill and internal water management channels weep water away from your home.*
- *Low-profile fusion-welded sashes subtly frame the view and allow abundant natural light into your home.*
- *Shadow-grooved sash welds give the consistent appearance of mitered wood joints.*
- *Integrated sash interlock system eliminates drafts and provides secure protection unwanted elements. High Interlock placement affords an pleasantly uncluttered lock rail while providing tamper-proof peace of mind. Dual weatherstripping at the meeting rail supplements the design, providing the ultimate protection against air infiltration.*
- *Powdercoated die-cast cam locks will never rust or break and proved a secure defense against forced entry. Two locks are standard on windows over 24" wide*

- *Safe Home Night  
Locks are AAMA  
Certified against  
forced entry,  
delivering the luxury  
of ventilation along*

*with the unparalleled safety and security of a  
secondary lock.*

- *Extruded lift rails are an integral part of the sash design, giving seamless beauty and ergonomic fingertip-functionality that will last a lifetime.*

- *Heavy-duty G3 stainless steel constant force balance system maintains flawless sash alignment while offering the industry's smoothest and quietest operation.*
- *Full balance covers conceal the balance operating track and give a clean, finished appearance.*
- *Ample weatherstripping consists of synthetic wool pile with mylar fin strip that guards against air and water leakage.*
- *Double paned glass enhances insulation and reduces sound transmission.*
- *PPG's Intercept Warm Edge spacer system's structural design gives the best combination of energy efficiency and longevity, virtually eliminating condensation and seal failures.*

- *Extruded aluminum slimline screen frame with integrated removal tabs resists bowing and denting.*

- *Patented BetterVue™ screen mesh increases airflow and improves insect protection by utilizing a 30% smaller mesh opening and thinner fibers than standard screens. The result is higher light*

*transmittance, improved curb appeal and a significantly clearer view from inside or out.*

# Elegance Patio Doors

## Features & Benefits

- Solid color-through virgin vinyl maintains a natural appearance and will not chip, peel, corrode, rot or requires painting or scraping.
- Multi-Chambered I-Beam structural 6" frame provides superior strength and rigidity while offering the most adaptability for all installation methods.
- Modern fusion-welded beveled frame head and panel combines excellent energy efficiency and beautiful aesthetic appeal.
- High sill dam and internal water management channels weep water away from your home.
- Integrated interlock system eliminates drafts and provides secure protection unwanted elements. Dual weatherstripping at the meeting rail supplements the design, providing the ultimate protection against air infiltration.
- Steel reinforcement of vertical members ensures structural integrity.
- Neutral wood interior handle and powder-coated color matched exterior handle blend seamlessly with any style and lock securely.
- Self-leveling tandem steel rollers are adjustable for easy functionality that will last a lifetime.
- Ample weatherstripping consists of synthetic wool pile with mylar fin strip that guards against air and water leakage.
- Double paned tempered glass enhances insulation and reduces sound transmission.
- PPG's Intercept Warm Edge spacer system's structural design gives the best combination of energy efficiency and longevity, virtually eliminating condensation and seal failures.
- Heavy Duty extruded locking screen door stands up to even the heaviest traffic.
- Patented BetterVue™ screen mesh increases airflow and improves insect protection by utilizing a 30% smaller mesh opening and thinner fibers than standard screens. The result is higher light transmittance, improved curb appeal and a significantly clearer view from inside or out.

Elegance patio doors are available in these configurations:

*2 Panel Door –      Fixed Panel –      Transom*

*5068, 6068, 8068    2668, 3068, 4068*

Custom Sizes also available.

# Hyde Park

Premium Vinyl Replacement Windows

***Hyde Park Premium Replacement Windows combine the superb style and modern performance features that show you care about quality. When you invest in new windows, choose only the best. Hyde Park Premium Replacement Windows by Vinylmax.***

- Fusion welded frame and sash corners are secure, weathertight and never pull apart.
- Multi-chambered vinyl frame is energy efficient, maintenance-free and lasts a lifetime.
- Beveled exterior frame enhances curb appeal.
- Cove moulded detail at head of window creates instant elegance.
- Tamper resistant overlap interlock spans the full width of the window to ensure that drafts and the elements stay out.
- Multiple rows of weatherstripping on frame and sash reduce air infiltration.
- Sloped sill with internal water management system facilitates easy water runoff and weeps moisture away.
- Compression bulb at the sill provides a weathertight seal for extra protection against the elements.
- Ergonomically designed integral lift handles at the top and bottom will never pull loose.
- Recessed cam action locks not only put the sashes together for secure locking, but also activate a hidden mechanism that allows the double hung sashes to tilt in for easy cleaning.
- AAMA certified dual night locks limit sash movement to permit secure ventilation when the window is partially open.
- Constant force balance system allows sashes to move freely with no adjustment needed.
- Intercept Warm-edge spacer system has proven seal integrity and conducts less heat and cold than other systems.
- Double strength, double paned insulated glass produces optimal energy performance and includes glass breakage warranty.

All Vinylmax windows with optional IntelliGlass meet ENERGY STAR requirements for all regions of the USA.

Vinyl Replacement Windows

***Easton Replacement Windows by Vinylmax  
exceed the high standards you have for your  
home and your family.***

- Fusion welded frame and sash corners are secure, weathertight and never pull apart.
- Multi-chambered vinyl frame is energy efficient, maintenance-free and lasts a lifetime.
- Beveled exterior frame enhances curb appeal.
- Full width overlap interlock ensures drafts and the elements stay out.
- Double paned insulated glass produces optimal energy performance.
- Intercept Warm-edge spacer system has proven seal integrity and conducts less heat and cold than other systems.
- Integral lift handles at the top and bottom will never pull loose.
- Multiple rows of weatherstripping on frame and sash reduce air infiltration.
- Tilt latches allow sashes to tilt or swing in for convenient cleaning from inside the home. Some sliding window styles feature lift-out sashes.
- Cam action double locks provide safe and secure locking on windows wider than 24". Smaller windows have only one lock.
- AAMA certified dual night locks limit sash movement to permit secure ventilation when the window is partially open.
- Constant force balance system allows sashes to move freely with no adjustment needed.
- Compression bulb at the sill provides a weathertight seal for extra protection against the elements.
- Sloped sill with internal water management system facilitates easy water runoff and weeps moisture away.
- Many decorative color, style and grid options available.

All Vinylmax windows  
with optional IntelliGlass  
meet ENERGY STAR  
requirements for all  
regions of the USA.
